# ACTIVITIES

We aim to plant at least one tree for every student, faculty, and staff member on our campus, in alignment with the MeriLIFE movement initiated by AICTE.

We are committed to eliminating single-use plastics from our college and university campuses by encouraging the use of alternatives such as reusable bags and water bottles.

we conduct awareness programs on sustainable practices through interactive workshops, where students, staff, and faculty participate in hands-on activities and discussions, instilling a culture of sustainability.
